

Simas Razinskas - AI Developer and Consultant

Production AI automation, LLM systems, agent workflows, RAG systems and internal tools.

Best fit

- AI automation that needs reliable state, retries, auditability and human review.
- LLM prototypes that need production boundaries, cost controls, evals, fallbacks and deployment.
- Agent workflows that need leases, approvals, escalation and an auditable execution trail.
- RAG and internal knowledge systems that need grounded answers, permissions and measured retrieval.

Evidence

- 12 production case studies: AI systems, job queues, media pipelines, SaaS isolation, deployment infrastructure.
- Public GitHub and source links back the anonymized private-system case studies.
- Delivery in English or Lithuanian, remote or in Vilnius.

Engagement shape

- 60-minute consulting call, EUR 80/hour, invoiced ahead of the call.
- Outputs: a diagnosis, an architecture direction, and the smallest next step worth taking.
- Start at simasrazinskas.com/book-me or send context to simas@simasrazinskas.com.
